Subject: Re: Request for Proposal – School Website Development for BRAINSMART SCHOOL

Dear Micheal,

Thank you for your reply, and congratulations on opening BrainSmart School! No apology needed — I'm glad to hear from you.

I studied the reference site (centervillees.gcpsk12.org) carefully. It has the structure of a typical school website: a utility bar with Student/Family portals and search, a three-level main menu (Calendar, About Us, Academics, Parents, Students, Programs/Services), a home page slideshow, quick links, news, upcoming events, a Faculty & Staff directory, a calendar, and a left-hand "In This Section" menu on inner pages. **I've rebuilt that same set of pages and structure for BrainSmart and given it a more modern, mobile-friendly design.** You can see a working preview here: **[Vercel preview link]**

Your questions

1. **Owner or manager?** [Choose one: "I am the owner of [Business name] and I will personally lead your project." / "I am the project manager at [Business name]; our development team builds and supports the site, and I am your single point of contact."]
2. **Estimate (6-week delivery, including hosting and domain):**

Item	Cost (USD)
Website design & development (all pages from the reference structure, calendar, staff directory, news, search, forms, mobile-ready)	$1,435
Domain name – 1 year (registration paid on your behalf, billed at cost)	~$20
Hosting – 1 year (Vercel Pro, fast global CDN, free SSL certificate)	$240
Total	**$1,695**

This is inside your $1,500–$2,000 budget. It also includes 30 days of free support after launch and training for your staff. Optional extras (professional email, language translation, an editor-friendly CMS) are listed in the attached proposal — none are required.

3. **Domain – an important note.** I'm sorry to say that **brainsmartschool.edu is very likely not available to you.** The `.edu` ending is reserved for accredited US colleges and universities, so a new K-12 school can't register it. I recommend **brainsmartschool.org** (`www.brainsmartschool.org`), which is

trusted, familiar and what most schools use. `.school` and `.com` are also options. I'll check availability the moment you approve.

4. **Content.** Perfect — having your consultant prepare the text, logo and artwork is exactly what keeps us on schedule. I'll need the content by **end of Week 2**. I've prepared a simple content checklist so your consultant knows exactly what to send.

To get started I need from you:

- Your approval of the estimate, and the 40% deposit invoice ([amount: $678]).
- Confirmation of the domain (`.org` recommended).
- Your consultant's contact details.
- A few facts: grades offered, school address/phone/email, office and school hours, the web addresses of any parent/student portals you use, and which email should receive website enquiries.

If you'd like, I can walk you through the demo on a short call this week. I'm confident BrainSmart will be live within 6 weeks of kickoff.

Kind regards,
[Your name]
